Lesson 4.1.1B Resource Page

**Entering Data**

Press **STAT** then select Edit. (1)

NOTE: If you want to clear data in a list, move the curser onto the list name. Press **CLEAR**, then **ENTER**, and you will clear the list. (2)

Enter data on the top position of List 1 [L1] then press **ENTER**. When finishing entering data into [L1], press **2** to move to List 2 [L2]. Make sure that the two lists have the same number of entries for a scatter plot. (3)

**Setting Up A Scatter Plot**

Press **2nd** then **Y=**. This will call up the **[STAT PLOT]** window. (4)

Press **ENTER**. This will call up the window for Plot1. (5)

Press **ENTER** to turn the stat plot 1 on.

NOTE: If your Xlist and Ylist are not [L1] and [L2], move the cursor over the spot and select **2nd** then the list number of the list needed. (6)

**Viewing The Scatter Plot**

Press **Y=** and delete any equations that you do not want to display with the scatter plot.

Press **ZOOM** then select option 9. This will set up your window appropriately to graph your data. (7)
