**Your Task:** As a team, do the following:

- Each team member should write his or her name on one of the shape cards.
- Place Figure E and all the fact cards face up in the middle of the table so everyone can see them.
- Work together to match each tile shape with one fact so that each fact has only one shape and each shape has only one fact.
- If you want to change the shape with a clue, you must convince the person whose name is on the card of the shape being changed. He or she is the only person that can touch that shape card.
- Once everyone on the team is convinced that each fact is paired with one shape, call your teacher over. Be prepared to justify your choices!
