### Team Roles

**Resource Manager:**
- Get the strips of paper, tape, scissors, and Lesson 1.1.2A Resource Page for your team.
- Call the teacher over for questions only when teammates do not know an answer:  
  “No one has an idea? Should I call the teacher?”
- Make sure the tape and scissors are taken care of and returned in an orderly manner.

**Facilitator:**
- Start productive conversations and solicit ideas from teammates: 
  “Who knows how to start?”
  “What do you think will happen when…?”
  “Does anyone know why that happened?”
- Make sure everyone understands your team’s answers before you move on: 
  “Do we all agree?”
  “I’m not sure I get it yet—can someone explain?”

**Recorder/Reporter:**
- Help your team members understand how to record their predictions and results on their table.

**Task Manager:**
- Make sure no one talks outside your team.
- Help keep your team on-task and talking about math: 
  “Ok, let’s get back to work!”
  “What does the next question say?”
- Encourage everyone to justify their thinking: 
  “Explain how you know that.”
  “Can you prove that?”
