Chapter 5 Closure Resource Page: Choosing a Strategy/Tool GO

Show how you can use at least 3 tools from the chapter to solve problems. Each problem may be solvable with more than one strategy. You may want to start by first listing the tools from the chapter in Box 1 and then using the organizer below to help you with each problem.

1. Tools from the chapter:

2. The problem (including any directions or diagrams):

3. A description of the relationships or parts I recognize in the diagram that I can use to solve this problem:

4. Choose a strategy/tool
   What can help you combine what you have from the two boxes above to find a solution?

5. The execution of the strategy/tool and solution:
