Lesson 9.1.1B Resource Page

**Entering Data**

(1) Press **STAT** then select Edit.

(2) NOTE: If you want to clear data in a list, move the curser onto the list name. Press **CLEAR**, then **ENTER**, and you will clear the list.

(3) Enter data on the top position of List 1 [L1] then press **ENTER**. When finishing entering data into [L1], press **▼** to move to List 2 [L2]. Make sure that the two lists have the same number of entries for a scatterplot.

**Setting Up A Scatterplot**

(4) Press **2nd** then **Y=**. This will call up the **STAT PLOT** window.

(5) Press **ENTER**. This will call up the window for Plot1.

(6) Press **ENTER** to turn the stat plot 1 on.

NOTE: If your Xlist and Ylist are not [L1] and [L2], move the cursor over the spot and select **2nd** then the list number of the list needed.

**Viewing The Scatterplot**

Press **Y=** and delete any equations that you do not want to display with the scatterplot.

(7) Press **ZOOM** then select option 9. This will set up your window appropriately to graph your data.
